

PATENTED VARIABLE BLADE CHALLENGES THE LIMITS

Standard Features:

- **Dirt and Snow Management:** Position the blade multiple ways to move heavy snow or light material for a variety of applications
- **Variable Blade Positions:** For the 'V-cut,' position both blades backward; for 'scooped,' position both forward; for a straight cut or angle, just move the individual blades accordingly up to 30 degrees to the right or left
- **Electro-Hydraulic Controls:** Electric controls on skid steer models make it easy to position the blade with a different angle or tilt
- **Double Hydraulic Cylinders:** Quick connect couplers allow for easy attaching to any skid steer
- **Easy Transitions:** Use this blade for dirt work or snow management with a quick change of the trip springs and lock out pin
- **Reversable Cutting Edge:** Save time and money with this removable, reversible, and replaceable cutting edge
- **Adjustable Depth Guides:** Manually adjust the spacers on the skid shoes to modify blade height, allowing control over blade height and surface contact
- **Rolled Steel Blade:** We take the time to roll our thick steel for the best material movement, and we offer one solid steel blade which minimizes breakdowns
- **Universal Mount:** Allows for one standard attachment for skid steers and for mini skid steers, no need for special hook-ups or attachments
- **Rugged Built and Out Performing:** We manufacture with American steel and inspect against the highest quality standards; just one of the reasons our employees are so proud of this Midwest-made product
- **Continual Improvement:** At HitchDoc, we take our products out year after year and push them to the breaking point; whether moving logs, earth, snow, rock, or mulch—we try it all to maintain our quality levels

Optional Features:

- **8-inch Blade Extension:** Attaches to the top of the blade and made from steel to increase capacity
- **Rubber Cutting Edge:** This 1 inch thick, 6-inch wide option minimizes wear on the plowing surface
- **Float Kit:** Available on skid steers over 50 HP, this option operates independently from the machine to self-adjust the blade-surface contact

SPECIFICATIONS

Model Options	Machine Type	HP Required	Height	Width Options
Standard V-Blade & Universal Mount	Skid Steer	Below 50 HP	28.25"	5', 6', 7', 8', 9'
Professional Heavy Duty V-Blade & Universal Mount	Skid Steer	50+ HP	28.25"	6', 7', 8', 9'
Mini Skid V-Blade & Universal Mount	Mini Skid Steer	NA	22"	4', 5'
Bobcat Mini Track Mount V-Blade	Mini Skid Steer	NA	22"	4', 5'

Similar Products

Sandpiper Spreader

Scoop sand, salt, seed or fertilizer with the hardened cutting edge of the hydraulically-powered Sandpiper Spreader. Spread widths from 30 inches up to 30 feet.

Push-Off Ejector Bucket

Achieve faster eject cycle times with this patent pending product, all while minimizing wear and tear on equipment by no longer 'shaking' sticky materials.

Skid Steer Snowblower

Full hydraulic controls make snow blowing a breeze! Easily attaches to skid loaders, and made from high strength steel so it's built to last.
