

MC-1000 PROPANE JOINT SAW

The MC-1000 is a Certified Propane Powered, self-propelled Joint Clean-out Saw/Mill designed to clean out existing control joints for new joint fill applications or to remove failing or deteriorated joint fill material. Ideal for large joint clean-out projects where a certified propane power source is preferred over gas or electric, this machine efficiently removes polyurea, epoxy, and polyurethane joint fill materials.

For maximum productivity, a 16-blade configuration provides a full 4" cutting width, with other blade setups available to meet specific job requirements. Power comes from a 23 HP Briggs & Stratton Vanguard V-Twin certified propane engine featuring electric start, high torque, and a twin-cylinder design that reduces vibration for smooth, reliable operation.

Features:

- Can hold up to 16 blades for a cutting width of 4"
- Equipped with a CO monitor
- Up cut blade rotation removes debris and material from the joint and ejects it up towards the vacuum port
- Versatile blade configurations provide solutions for joint clean-out and spalled joint restoration
- Redesigned belt drive system for easier maintenance and longer wear life
- Front and rear pointer guides for accuracy

MC-1000 SPECIFICATIONS

Part Number	SX78200
Fuel Type	Propane
Engine/ Tank	23 HP Briggs
Max Cutting Depth	3"
Max Cutting Width	4"
Arbor	1" with DPH
Blade Size	8" to 10"
Blade Width	.150" and standard options
Dust Collector Size	350+ CFM
Weight	600
